Experience

Systems Developer [Technology Services Group, Chicago] September 2013 – February 2014

- As a systems developer, I worked closely with analysts to implement Electronic Content Management solutions for a variety of clients. I had the opportunity to further develop my skills by working with Java web development services, Javascript, HTML/CSS, jQuery, etc.

Software Development Assistant [Trinkon LLC] August 2011 – December 2012

- Worked under supervision of project leader to design, develop and test a Facebook application that uses Persuasive Technology principles. Responsible for developing mobile versions of Trinkon for the iPhone and Android platforms

Computer Science Instructor [internalDrive] June 2012 – August 2012

- Taught Java and HTML/CSS at Stanford University for a summer technology camp. Was responsible for developing and delivering lessons to students aged from 10 – 18 as well as supervising their project work.

Software Development Research Assistant [DePauw University] May 2011 – August 2011

- Worked with a small research group to develop software applying the principles of Persuasive Technology. Designed, developed and tested a Visual Basic .NET software system to prevent electronic distraction utilizing these principles.

Teaching Assistant for Introduction to Computer Science [DePauw University] February 2010 – May 2010

- Assisted the Professor during class and in laboratory sessions to introduce computer science concepts to students through the programming language Java.

Education
