EDUCATION

DePauw University (Bachelor of Arts)
- **Major:** Computer Science
- **Major GPA**: 3.29   **Cumulative GPA:** 3.20
- Information Technology Associates Program (Honors Program)
- President's Award for Excellence Scholarship
- Dean's List for Spring Semester 2010, Spring Semester 2011

PROFESSIONAL EXPERIENCE

Technology Servives Group
- *Systems Developer*   *September 2013 – February 2014*

As a systems developer, I worked closely with analysts to implement Electronic Content Management solutions for a variety of clients. I had the opportunity to further develop my skills by working with Java web development services, Javascript, HTML/CSS ,jQuery,etc.

Trinkon LLC
- *Software Development Assistant*   *August 2011 – December 2012*

Worked under supervision of project leader to design, develop and test a Facebook application that uses Persuasive Technology principles. Responsible for developing mobile versions of Trinkon for the iPhone and Android platforms.

internalDrive
- *Computer Science Instructor*   *June 2012 – August 2012*

Taught Java and HTML/CSS at Stanford University for a summer technology camp. Was responsible for developing and delivering lessons to students aged from 10 – 18 as well as supervising their project work.

DePauw University
- *Software Development Research Assistant*   *May 2011 – August 2011*

Worked with a small research group to develop software applying the principles of Persuasive Technology. Designed, developed and tested a Visual Basic .NET software system to prevent electronic distraction utilizing these principles.

- *Teaching Assistant for Introduction to Computer Science*   *February 2010 – May 2010*

Assisted the Professor during class and in laboratory sessions to introduce computer science concepts to students through the programming language Java.

COMPUTING SKILLS

- **Programming Languages**: Java, C++,Javascript, HTML, CSS, Ruby on Rails, VB.Net, jQuery and Android application development
- **Relevant Coursework**: Cyber-security and Web Programming, Artificial Intelligence, Introduction to Data Structures, Graphics, Software Development, Foundations of Computation, Computer Systems, Ethics and the Digital Divide and Operating systems.
- **Operating Systems**: Mac OS, Windows and Linux Operating Systems
- **Soft Skills**: Experience with software development project skills such as System Analysis & Design, Database Management, Coding & Implementation, Debugging & Maintenance and Software Engineering
- **Application Proficiency**: Dreamweaver, MS Office and Adobe Photoshop

ADDITIONAL INFORMATION
